RAVEN D. V MARCIANO

Full-Stack Developer | Python & AI Developer

San Rafael, Bulacan, Philippines | tim180646@gmail.com | 09085006659

PROFESSIONAL SUMMARY

Software Engineer with 7 years of experience building web applications, backend systems, APIs, and AI-powered solutions across different software projects. Experienced with JavaScript, React, PHP, Laravel, Next.js, and Python, with a growing focus on AI development and intelligent software features.

Skilled in taking projects from requirements analysis and technical planning to development, integration, testing, and deployment. Enjoy solving complex technical problems, improving software systems, and creating practical solutions that deliver real business value.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Cronumax | 2025 – 2026

- Developed full-stack applications, APIs, integrations, and backend systems using JavaScript, React, PHP, Laravel, and Python.
- Managed projects throughout the development lifecycle, including requirement analysis, technical planning, implementation, testing, and deployment.
- Collaborated with clients and development teams to design solutions, resolve technical challenges, and deliver reliable software products.
- Integrated modern technologies and AI-related features into applications to improve functionality and user experience.

Software Developer

Hal Crow | 2023 – 2024

- Developed Python-based software solutions and AI-powered features for practical business applications.
- Integrated machine learning capabilities with existing web applications and backend systems.
- Worked with developers and stakeholders to transform AI concepts into usable product features.
- Improved understanding of AI development workflows, software architecture, and production-level implementation.

Junior Machine Learning Engineer

Javacatz | 2021 – 2023

- Built and maintained web applications using JavaScript, React, PHP, and Laravel while working with APIs, databases, and external integrations.
- Applied Python programming and machine learning concepts to support AI-related software projects.
- Improved existing systems by debugging issues, optimizing functionality, and adapting solutions to changing requirements.
- Gained experience across frontend, backend, and AI development environments.

Frontend Developer

Freelancer | 2020 – 2021

- Developed responsive and interactive web interfaces using JavaScript, React, HTML, and CSS.
- Converted designs and requirements into functional user experiences.
- Integrated frontend applications with APIs and backend services.
- Expanded technical skills beyond frontend development through Python and AI-related projects.

TECHNICAL SKILLS

Frontend:
JavaScript, React, Next.js, Angular, TypeScript, HTML, CSS, Tailwind CSS, Responsive Web Development

Backend:
PHP, Laravel, Python, Django, Node.js, Express.js, REST APIs, Backend Systems

AI & Machine Learning:
Python, Machine Learning Fundamentals, TensorFlow, NumPy, Pandas, AI-Powered Applications

Databases:
MySQL, PostgreSQL, MongoDB

Development Tools:
Git, GitHub, Linux, Debugging, Testing, Deployment

Software Development:
Full-Stack Development, Web Applications, Software Architecture, System Integration

---

EDUCATION

Bachelor of Science in Information Technology,
Baliwag Polytechnic College,
January 2020
